ABOUT AI?**

What is AI?

The Checklist

What AI Is:

- ✓ A tool for generating new ideas or content (e.g., a first draft of an email or blog post).
- ✓ A sophisticated assistant that can summarize long documents or complex data.
- ✓ A technology that learns from data to make predictions or decisions.
- ✓ Something that can save you time on tedious, repetitive, or complex tasks.
- ✓ A tool that can automate parts of a creative or analytical process.

What AI Is NOT:

- ✗ A magical solution that is always right. It can and will make mistakes.
- ✗ A replacement for human creativity, critical thinking, or expertise.
- ✗ Always a source of verifiable, fact-checked information.
- ✗ A conscious, human-like entity (at least not yet).
- ✗ Something you can use without any thought or oversight.
